I certify to the best of my knowledge and belief that all the information supplied is true and accurate.

Proposer Name:

Proposer Signature:

Date:

In the case where multiple people have supplied the information, they should all supply their names and signature in the relevant sections. The signature at the end is the overall proposer who may not be the person underpinning all the data accuracy but is the one submitting the overall proposal.

The NRC will respond in writing (e-mail) to verify the next action / decision made (maybe to request more details). In the case where a candidate is unsuccessful, the proposer may choose to submit more information or in exceptional circumstances log an appeal directly with the NRC secretary.

Note: In general, significant contributions to the development of refereeing or those activities having a direct impact promoting refereeing will be those items of greater value in this application process.

All forms to be submitted to the NRC secretary in the first instance.
